Foot & Ankle care with a Gentle touch for the entire family

- Do you suffer from a painful toenail?*
- Warts that hurt when you walk?*
- Painful corns and calluses?*
- A sharp pain on the bottom of your foot?*
- A sore on your foot that won't heal?*
- Thick and ugly toenails?*
- A foot or ankle fracture or injury?*
- Dry and cracked skin on your feet?*
- Do you have diabetes?*

These are some common ailments that a **PODIATRIST** treats. A podiatrist is a doctor that has special training that focuses on your feet and ankles.

Your feet and ankles contain 26 bones (1/4 of all bones in the human body), 33 joints, over 100 muscles, tendons, and ligaments, and a network of blood vessels, nerves, skin, and soft tissue. These components work together to provide the body with support, balance, and mobility.

So much of our daily lives involve using our feet and ankles. If you're frustrated with foot problems, maybe it's time to see a podiatrist. Modern treatments exist to end your pain and improve the quality of your daily life.

INSURANCE

Most podiatry services are an insurance plan benefit, just like seeing your other doctors. We file all insurances for you and are participating providers for University of Iowa insurance plans, Wellmark Blue Cross Blue Shield, Aetna, United Healthcare, Medicare, Medicaid, Cigna, Principal, and many others. Check your insurance policy or with your plan administrator for coverage.
